Non –Invasive

The Axial Decompression System used is a simple, non-invasive way to ease pinched nerves, muscle tension for cervical, spinal pain and other related problems.

There are no needles, no drugs, nothing that enters your body. Decompression traction is simply mechanical stretching of your spine and surrounding muscles.

Axial Decompression Traction is a safe alternative to surgery, nerve stimulators and addictive pain killers.

Comfortable

Axial Decompression Traction Therapy is a very comfortable and relaxing treatment.

Decompression traction is similar to massage. You relax on a supportive table and allow the traction unit to slowly and gently open and close your vertebrae.

Decompression Traction allows blood and important nutrients to flow into the vertebral discs. It can also help free up pinched nerves that cause muscle spasms.

Effective

Decompression Traction has many years of research & practice. It can benefit people who suffer from:

- ✓ **Herniated Discs**
- ✓ **Pinched Nerves**
- ✓ **Chronic Headaches**
- ✓ **Whiplash**
- ✓ **Radiculopathy**
- ✓ **Low Back Pain**
- ✓ **Sciatica**
